EDUCATION

L.J. Institute of Engineering and Technology — B.E. Information Technology	Ahmedabad, Gujarat	2023 – Present
A.G. High School — 12th (GHSEB)	Ahmedabad, Gujarat	2022 – 2023
A.G. High School — 10th (GSEB)	Ahmedabad, Gujarat	2020 – 2021

TECHNICAL SKILLS

Languages: Python, Java, React.js, Node.js, .NET, HTML, CSS, JavaScript
Developer Tools: VS Code, Notepad++, Google Colab, Jupyter Notebook
Databases: PostgreSQL, MongoDB
Coursework: Data Structures and Algorithms, Object Oriented Programming, Operating Systems, DBMS
Soft Skills: Problem Solving, Effective Teamwork, Creativity, Time Management, Communication
Areas of Interest: Competitive Programming

PROJECTS

Food Verse – MERN Stack Food Ordering Platform | *MongoDB, Express.js, React, Node.js, JWT, Tailwind CSS*

- Built a full-stack food ordering web app with JWT authentication, restaurant/food management, cart, favorites, order placement, and order tracking.
- Integrated Cloudinary for image uploads and designed secure RESTful APIs with MongoDB for efficient data management.
- Built a responsive, user-friendly interface with CRUD operations and role-based access for a scalable application.

Library Management System | *Java, PostgreSQL, Data Structures*

- Developed a system using Java, PostgreSQL, and JDBC to manage book inventory, issuance, returns, and fine calculation.
- Applied HashMap for O(1) book search, Queue for reservation wait-lists, and ArrayList for issued-book tracking.
- Designed a normalized database schema and enforced business rules (max 3 books/user, ₹5/day fine) via triggers and transactions.

Student Performance Predictor | *Django, Scikit-learn, Pandas, Matplotlib*

- Built a web-based prediction system using KNN, Decision Tree, and Linear Regression to forecast academic performance.
- Designed a Django portal with role-based authentication (student/teacher/admin) and an interactive dashboard.
- Integrated visualizations to identify at-risk students and deployed the app with PostgreSQL for real-world use.

Goal Tracker with Streaks | *MongoDB, Express.js, React, Node.js, JWT, Tailwind CSS*

- Built a full-stack app to set, track, and complete personal goals with daily streaks and JWT-based authentication.
- Designed a React frontend with Hooks & Context API and a clean, responsive Tailwind CSS interface.
- Developed a Node.js + Express backend with REST APIs and MongoDB for persistent goal and streak data storage.
