Education

L.J. Institute of Engineering and Technology

2023-Present
Ahmedabad, Gujarat

12th:A.G.HighSchool(GHSEB)

2022 - 2023
Ahmedabad, Gujarat

10th:A.G.HighSchool(GSEB)

2020 - 2021
Ahmedabad, Gujarat

Projects

Library Management System | Java , Postgre SQL, DataStructures

- Developed a **Library Management System** using **Java**, **Postgresql** and **JDBC** to manage book inventory, issuance, returns, and fine calculation.
- Implemented **DSA concepts** like **HashMap** for $O(1)$ book search, **Queue** for reservation wait list, and **ArrayList** for issued books tracking.
- Designed a normalized **database schema** with tables for books, students, and transactions ; used SQL queries for CRUD operations.
- Enforced business rules(max3books/user, ₹5/dayfineafter7days)with **triggers and transactions** for data integrity.
- Built a console-based interface with menu-driven operations, demonstrating , **OOP principles** and modular code structure.

Student Performance Predictor | Django, MachineLearning(Scikit-learn), Pandas, Matplotlib

- Developed a **web-based prediction system** to forecast student academic performance using regression/classification models.
- Implemented **data preprocessing, feature engineering and model training**(KNN, DecisionTree, Linear Regression)for accurate predictions.
- Designed a **Django-based web portal** with user authentication (student/teacher/admin roles) and an interactive dashboard.
- Integrated **visualizations**(histograms ,trend charts)to identify at-risk students and provide improvement tips.
- Deployed the application with **PostgreSQL** for real-world accessibility.

GoalTrackerwithStreaks|MERN Stack(MongoDB, Express.js, React, Node.js), JWT, TailwindCSS

- Built a **full-stack web app** to help users set, track and complete personal goals with **daily streaks**.
- Implemented **JWT-based authentication** (login, register, logout)with secure API routes.
- Designed a **React frontend** using Hooks & Context API for state management and a cleanUI with TailwindCSS.
- Integrated **goal creation, progress tracking , and streak visualization** using interactive charts and a calendar view.
- Developed a **Node.js+Express backend** with RESTAPIs and **MongoDB** for persistent goal and streak data storage.

TechnicalSkills

Languages:Python, Java, React.js, node.js, .NET, Html, CSS, Javascript

Developer Tools : VSCode , Notepad++ , Google Colab , Jupyter Notebook

Databases:PostgreSQL, MongoDB

Soft Skills:Problem Solving, Effective teamwork, Creativity, Time Management, Communication

Coursework: Data Structures and Algorithms, Object Oriented Programming, Operating Systems, DBMS

Areas of Interest : Competitive Programming

Certificates

- Exploratory Data Analysis for Machine learning: <https://coursera.org/share/f4d51e8b56b78ac2d9c4212368dfba20>
- Inheritance and Data Structures using Java: <https://coursera.org/share/0145c158cbc7808ad5683aa23a8d3c48>
- Introduction to HTML, CSS, Javascript : <https://coursera.org/share/c86d57b90ab3f0b45bc398d791078a6b>
- Introduction to Java: <https://coursera.org/share/82cdc3e79b91cef1e0f4d49f1a6df>
